

# Rabbit Central

*A computer program to meet all the daily needs of the modern rabbit breeder.*

## Take Control of your Rabbit Management

*How much control do you have of your rabbit enterprise?*

### A Commercial Rabbitry Management System

**Rabbit management and performance recording database software specifically designed to meet the needs of the modern Australian rabbit producers.**

Rabbit Central is a simple database system designed to maintain, edit and retrieve daily management records.

### How do you keep track of your records?

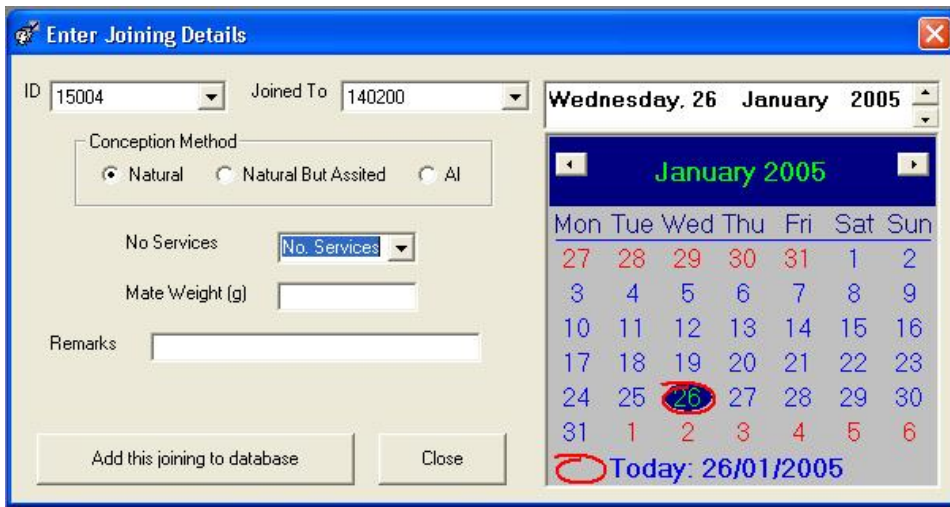

- Would you like to save time and money?
- Do you spend too much time manually calculating dates?
- Do you have litters being born on the cage floor?
- Do you want to be able to evaluate the performance of any rabbit or the whole rabbitry at the press of a button?

***If you answered yes to any of these questions then Rabbit Central is just what you need!***

Growtec Rabbits have used various methods to record the many activities required in the day-to-day operation of a large-scale commercial rabbit breeding enterprise. We were unable to find a technique suitable so we produced **Rabbit Central**. It needed to be many things to fulfill our needs, and we can not imagine our enterprise without it. Not only is day-to-day management a breeze, but you can examine data to assess your performance thus improving productivity. This brochure contains some examples of it's worth when utilised in a rabbit breeding program. The Rabbit industry is a young one so Growtec are continuously searching for new equipment and technology to assist us achieve our goals. Rabbit Central has been used commercially for over 6 years now and has evolved into an important asset to many users.

- Easy to use drop down menus
- Toolbar buttons
- Tooltips
- Big buttons

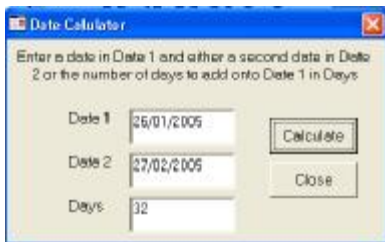

## Help

- Online help
- Printed Manual
- Telephone assistance

## Daily Tasks Reports

- Search for any date range
- Individual tasks
- Combined report
